- Angular, React, Next.js
- JavaScript, TypeScript
- HTML5, CSS3, Bootstrap
- SQL Server, PostgreSQL
- REST API Development
- Git, GitHub, Postman
- Agile, SDLC, Testing

## LANGUAGES

- English (Fluent)
- Tamil (Fluent)
- Sinhala (Basic reading)

## PROFESSIONAL SUMMARY

Full stack web developer experienced in building and maintaining dynamic web applications end to end. Skilled in C#, .NET Core, Angular, React and Next.js, with SQL Server and PostgreSQL databases and REST API integration. Works in Agile teams, remote and on site, writing clean and scalable code.

## WORK EXPERIENCE

### Thriio (Remote, France)

MAY 2025 – JUNE 2026

Software Developer (Full Stack)

- Build full stack features end to end in Next.js, covering both the front-end interface and the back-end logic.
- Deliver scalable, responsive and user-friendly solutions inside a live production codebase.
- Work across planning, development, testing and deployment with an international remote team using Agile practices.

### UNICOM TIC

2024 – 2025

Full Stack Developer, Intern

- Developed front-end and back-end modules with .NET Core, Angular and SQL Server across a nine-month internship.
- Planned and organised tasks with the team so project deadlines were consistently met.
- Analysed user feedback and suggested usability improvements; gained hands-on Agile teamwork experience.

### Projects

2024 – 2025

Independent & Academic Work

- Bike Rental Management System (solo): HTML, CSS, JavaScript.
- Gym Fees Management System (solo): .NET Core, Angular, SQL Server.
- Bike Rental System (group project): full stack build with .NET Core (C#).
